---

## Education

**University of Colorado at Boulder**

**B.S. Electrical and Computer Engineering | Computer Science Minor**

**Graduating 2019**

**GPA: 3.455**

- Society of Hispanic Professional Engineers / Society of American Military Engineers
- Dean's List 2016-2018

## Relevant Experience

**Network for Exploration and Space Science Research | Colorado at Boulder**

**Dec 2017 - Present**

*Undergraduate Telerobotics Lab*

*Boulder, CO*

- Managing tests and experiments to remove constraints towards surface exploration through human-robotic teleoperations
- Creating interface for a teleoperated rover and 6-axis robotic arm with the robotic operating system using C++, C, and Python to engage in assembling a radio telescope array

**Aerospace Senior Design | Colorado at Boulder**

**Aug 2018 - Present**

*JPL Customer Rover Project*

*Boulder, CO*

- Designing a small remote-controlled rover that provides video, obstacle detection data, and GPS data in a forest like environment
- Leading the design for system integration to oversee software, communication, mobility, and controls

**Xcel Energy Engineering Internship | Xcel Energy**

**May 2017 - June 2018**

*System Performance Engineering Intern*

*Denver, CO*

- Built a .NET user interface dashboard display to better increase the team's accessibility to outage data
- Performed validation tests to correct organizational structure and speed of the code for the dashboard

**DARPA Spectrum Collaboration Challenge Research | Colorado at Boulder**

**Aug 2017 - Dec 2017**

*SpeCOLab Team*

*Boulder, CO*

- Constructed simple signal processing scripts for communication between two SDR radios
- Developed different Python containers for radio emulation testing of low latency and high throughput for the challenge

**Colorado Space Grant Consortium | Colorado at Boulder**

**Jan 2017 - May 2017**

*Lab Team*

*Boulder, CO*

- Collaborated with a student team to better enhance the resources available to different project groups
- Developed a 360-degree rotating beacon transmitter for successful launch of a Mars Robotic Challenge

## Class Projects Experience

**University of Colorado at Boulder**

**Aug 2015 - Present**

*Class Projects*

*Boulder, CO*

- Implemented C, C++, and assembly software for the LPC1115, an ARM Cortex M0 microcontroller board
- Designed a RISC-V processor pipeline through an unfamiliar development software tool
- Created an Android controlled robot that continuously collects and displays proximity readings
- Built a digital logic time keeping clock by manipulating logic gates with vigorous soldering

## Skills

**Programming Languages:** C, C++, Python, ROS, C# .NET, MATLAB, Assembly

**Software Tools:** Microsoft Office, Visual Studio, Github, Linux, Windows, PADS Mentor Graphics, GNU Radio

**Hardware:** SMT Component Assembly/Repair, Microcontrollers, PCB Design, Hand-Soldering

**Courses:** Aerospace Senior Design, Programming Digital Systems, Digital Design Lab, Computer Organization, Operating Systems, Digital Signal Processing, Systems Engineering, Human Spaceflight
